

GENERALI GROUP

2022 FIRST HALF RESULTS

The like for like change of written premiums and life net cash inflows is on equivalent terms (on equivalent exchange rates and consolidation area).

Operating result, Asset Under Management and Life technical provisions exclude assets under disposals or disposed during the period, if any.

1H21 numbers for PVNBP, NBV and NBM are presented on historical basis, without excluding asset disposals. The like for like changes are on equivalent terms.

1. Changes are calculated on equivalent terms, i.e. reflecting the same exchange rates at 30.06.2021 and a homogeneous consolidation scope. In particular, the Cattolica Group has been consolidated on a line by line basis starting from the last quarter of 2021, the volumes KPIs related to 2022 include a contribution (€275m in terms of Life net inflows) which is neutralized in the calculation of changes on equivalent terms. The same treatment is applied to the acquisition of India Life (€23m), for which the full P&L consolidation has been reported from this quarter

2. Please note that the delta is not represented on a like-for-like basis

LIFE TECHNICAL RESERVES AFFECTED BY FINANCIAL MARKETS VOLATILITY

ARGENTINA HYPERINFLATION IMPACT ON THE GROUP COMBINED RATIO

- IAS29 Accounting standards apply to economies considered to be hyperinflationary. The Group has applied IAS29 to Argentina since 2018
- The Group CoR public disclosure reflects the Argentinean CoR before any hyperinflation adjustment - hence with no benefit from IAS29 application - to provide a conservative and comparable managerial view
- The Argentinean Combined Ratio computed before any hyperinflation adjustment was 120.0% at 1H22. The one computed by applying IAS 29 was 95.9% at 1H22, mainly due to the revaluation of prior year development
- Excluding the contribution of Argentina, the Group CoR would be 91.9% (89.4% at 1H21)
- It is important to stress that this has no effect on the contribution of Argentina to the Group's P&C Operating Result, impacting only the CoR representation

- In this pro-forma representation, Lion River's results shift from **Holding & Other businesses** (var. €-169m) mainly to **Life** and **Asset & Wealth Management** segments, with an impact on investment results
- In detail, **Life** (€+20 m net of profit sharing) and **Asset & Wealth Management** (€+44 m) benefit from a result allocation higher than distributed dividends. In the **P&C** segment (€ -22m), the result allocation has been lower than the dividend distributed
- The reduction of **Consolidation adjustments** (var. €+127m) stems from missing elimination of infragroup dividends, since the elision is included directly in participating companies' segments, which benefit from the direct allocation of Lion River's results

1. Estimate of Lion River's results allocation directly in participating companies' business segments
